

acm: certificates_expiry

Are certificates expiring soon?

Expired certificates can make services inaccessible for your customers.

Region	Certificate	Message	Action
us-east-1	somedomain.com 4a2750cd-35bb-4970-a0d6-270fc81d2247	Certificate is valid for more than 3 months	All good
ap-south-1	somedomain.com 4a2750cd-35bb-4970-a0d6-270fc81d2247	Certificate is valid for more than 3 months	All good
ap-south-1	somedomain.com 4a2750cd-35bb-4970-a0d6-270fc81d2247	Certificate is valid for more than 3 months	All good

ec2: security_groups_open_to_world

Are there any security groups open to world?

Security group open to world poses serious security threat so we need to allow only intended parties to access

Region	SecurityGroup	Message	Action
us-east-2	launch-wizard-2 sg-1234567abc	Security group is open to entire world	Remove rule containing IP range: 0.0.0.0/0.

iam: admin_count

Are there too many admins for the account?

It is hard to manage security goals when there too many admins as chances of mistakes increases

AdminUsers	Message	Action
user, user	Account has 2 admins	All good

iam: password_policy

Is account password policy following best practices?

It is important to have secure password policy as leaked or weak passwords can give direct access to attackers

Option	Message	Action
Minimum Password Length	This has a somedomain.commended value	All good
Require Symbols	Already Enabled	All good
Require Numbers	Already Enabled	All good
Require Uppercase Characters	Already Enabled	All good
Require Lowercase Characters	Already Enabled	All good
Expire Passwords	Already Enabled	All good
Max Password Age	This has a somedomain.commended value	All good
Password Reuse Prevention	New password shouldn't be same as at least last 3 used passwords	Set this to 3
Hard Expiry	User should contact the admin to reset the expired password	Set this to true. Use caution here if there is only admin for your account then don't set this

iam: root_user_access_keys_active

Are there any root user access keys active?

Root user access keys are unrestrictable hence shouldn't be used as damage will be detrimental if they gets leaked

User	Message	Action
<root_account>	Root user access keys are not active	All good

iam: cross_accounts_without_external_id

Are there accounts without ExternalId?

It is important to associate ExternalId for cross account role access

Roles	Message	Action
somedomain.comandRoleForManagedInstances	Account undefined does not have ExternalId	Add an ExternalId
apexDemoProject_lambda_function	Account undefined does not have ExternalId	Add an ExternalId

iam: users_access_keys_unused

Are there any user access keys unused?

It is important to delete unused or unneeded access keys as it reduces risk of misusing them

User	Message	Action
user	User access key 1 is unused	Delete unused user access key 1
user	User access key 1 is unused	Delete unused user access key 1
usera	User access key 1 is unused	Delete unused user access key 1
user	User access key 1 is actively used	All good
user	User access key 1 is actively used	All good
user-dev	User access key 1 is actively used	All good
user	User access key 1 is actively used	All good

iam: users_access_keys_old

Are user access keys are too old?

It is important to rotate access keys regularly as it will reduce improper use

User	Message	Action
user	User access key 1 is not rotated from last 180 days	Rotate user access key 1
user	User access key 1 is rotated within last 180 days	All good
usera	User access key 1 is rotated within last 180 days	All good
user	User access key 1 is rotated within last 180 days	All good
user	User access key 1 is rotated within last 180 days	All good
user-dev	User access key 1 is rotated within last 180 days	All good
user	User access key 1 is not rotated from last 180 days	Rotate user access key 1

iam: user_accounts_mfa_enabled

Are there any user access keys unused?

It is important to delete unused or unneeded access keys as it reduces risk of misusing them

User	Message	Action
user	User account is MFA enabled	All good
user	User account is MFA enabled	All good
user	User account is MFA enabled	All good
usera	User account is MFA enabled	All good
user	User account is MFA enabled	All good
user	User account is MFA enabled	All good
user	User account is MFA enabled	All good
user-dev	User account is MFA enabled	All good
user	User account is MFA enabled	All good
user	User account is MFA enabled	All good

rds: default_security_groups_used

Are there any default security groups used for RDS instances?

Default security groups are open to world by default and requires extra setup make them secure

Region	Instance	Message	Action
us-west-1	someapp-123456abc	Default security groups are used	Use custom security group instead default security group

rds: default_vpcs_used

Are there any default vpc used for RDS instances?

Default vpcs are open to world by default and requires extra setup make them secure

Region	Instance	Message	Action
us-west-1	someapp-123456abc	Default VPC is not used	All good

rds: encryption_enabled

Is encryption enabled for RDS instances?

It is important to encrypt data at rest

Region	Instance	Message	Action
us-west-1	someapp-123456abc	RDS instance is not encrypted at rest	Enable storage encryption at rest for the instace

rds: publically_accessible

Are there any publically accessible RDS instances?

It is important to restrict RDS instances for private access only for most of the usecases

Region	Instance	Message	Action
us-west-1	someapp-123456abc	RDS instance is not publically accessible	All good

trails: cloud_trails_bucket_access_logs

Are access logs enabled for buckets containing Cloud Trails?

Cloud trails contains important security information so we need to limit access to them and also enable access logs for such buckets

Bucket	Message	Action
dev.tensult.cloudtrail	Access logs are not enabled	Enabled access logs

trails: cloud_trails_bucket_deletes_mfa_enabled

Is deleting cloud trails protected by MFA?

Cloud trails deletes should be MFA enabled so that attacker won't able to delete them

Bucket	Message	Action
dev.tensult.cloudtrail	Deletes are not MFA enabled	Enable MFADelete

trails: cloud_trails_enabled

Is cloud trails enabled for account?

Cloud trails helps understand who did what and this is utmost important when a security breach happens

Region	CloudTrails	Message	Action
us-east-2	cloudtrail-dev	Cloud trails are enabled	All good
us-east-1	cloudtrail-dev	Cloud trails are enabled	All good
us-west-1	cloudtrail-dev	Cloud trails are enabled	All good
us-west-2	cloudtrail-dev	Cloud trails are enabled	All good
ca-central-1	cloudtrail-dev	Cloud trails are enabled	All good
ap-south-1	cloudtrail-dev	Cloud trails are enabled	All good
ap-northeast-2	cloudtrail-dev	Cloud trails are enabled	All good
ap-southeast-1	cloudtrail-dev	Cloud trails are enabled	All good
ap-southeast-2	cloudtrail-dev	Cloud trails are enabled	All good
ap-northeast-1	cloudtrail-dev	Cloud trails are enabled	All good
eu-central-1	cloudtrail-dev	Cloud trails are enabled	All good
eu-west-1	cloudtrail-dev	Cloud trails are enabled	All good
eu-west-2	cloudtrail-dev	Cloud trails are enabled	All good
sa-east-1	cloudtrail-dev	Cloud trails are enabled	All good

trails: cloud_trails_encryption_at_rest

Are Cloud trails encrypted at rest?

Critical data should always be encrypted at rest

Region	CloudTrail	Message	Action
us-east-2	cloudtrail-dev	Encryption not enabled	Enable encryption at rest
us-east-1	cloudtrail-dev	Encryption not enabled	Enable encryption at rest
us-west-1	cloudtrail-dev	Encryption not enabled	Enable encryption at rest
us-west-2	cloudtrail-dev	Encryption not enabled	Enable encryption at rest
ca-central-1	cloudtrail-dev	Encryption not enabled	Enable encryption at rest
ap-south-1	cloudtrail-dev	Encryption not enabled	Enable encryption at rest
ap-northeast-2	cloudtrail-dev	Encryption not enabled	Enable encryption at rest
ap-southeast-1	cloudtrail-dev	Encryption not enabled	Enable encryption at rest
ap-southeast-2	cloudtrail-dev	Encryption not enabled	Enable encryption at rest
ap-northeast-1	cloudtrail-dev	Encryption not enabled	Enable encryption at rest
eu-central-1	cloudtrail-dev	Encryption not enabled	Enable encryption at rest
eu-west-1	cloudtrail-dev	Encryption not enabled	Enable encryption at rest
eu-west-2	cloudtrail-dev	Encryption not enabled	Enable encryption at rest
sa-east-1	cloudtrail-dev	Encryption not enabled	Enable encryption at rest

trails: cloud_trails_global_service_events

Are global service events included in CloudTrails?

We need to enable this option to keep track of events from global service like IAM

Region	CloudTrail	Message	Action
us-east-2	cloudtrail-dev	Global service events are included	All good
us-east-1	cloudtrail-dev	Global service events are included	All good
us-west-1	cloudtrail-dev	Global service events are included	All good
us-west-2	cloudtrail-dev	Global service events are included	All good
ca-central-1	cloudtrail-dev	Global service events are included	All good
ap-south-1	cloudtrail-dev	Global service events are included	All good
ap-northeast-2	cloudtrail-dev	Global service events are included	All good
ap-southeast-1	cloudtrail-dev	Global service events are included	All good
ap-southeast-2	cloudtrail-dev	Global service events are included	All good
ap-northeast-1	cloudtrail-dev	Global service events are included	All good
eu-central-1	cloudtrail-dev	Global service events are included	All good
eu-west-1	cloudtrail-dev	Global service events are included	All good
eu-west-2	cloudtrail-dev	Global service events are included	All good
sa-east-1	cloudtrail-dev	Global service events are included	All good

trails: cloud_trails_log_validation

Is log file validation enabled for cloud trails?

Cloud trails helps understand who did what so enabling log file validation keep their integrity intact

Region	CloudTrail	Message	Action
us-east-2	cloudtrail-dev	Log validation is enabled for the cloud trail	All good
us-east-1	cloudtrail-dev	Log validation is enabled for the cloud trail	All good
us-west-1	cloudtrail-dev	Log validation is enabled for the cloud trail	All good
us-west-2	cloudtrail-dev	Log validation is enabled for the cloud trail	All good
ca-central-1	cloudtrail-dev	Log validation is enabled for the cloud trail	All good
ap-south-1	cloudtrail-dev	Log validation is enabled for the cloud trail	All good
ap-northeast-2	cloudtrail-dev	Log validation is enabled for the cloud trail	All good
ap-southeast-1	cloudtrail-dev	Log validation is enabled for the cloud trail	All good
ap-southeast-2	cloudtrail-dev	Log validation is enabled for the cloud trail	All good
ap-northeast-1	cloudtrail-dev	Log validation is enabled for the cloud trail	All good
eu-central-1	cloudtrail-dev	Log validation is enabled for the cloud trail	All good
eu-west-1	cloudtrail-dev	Log validation is enabled for the cloud trail	All good
eu-west-2	cloudtrail-dev	Log validation is enabled for the cloud trail	All good
sa-east-1	cloudtrail-dev	Log validation is enabled for the cloud trail	All good

vpc: flow_logs_enabled

Is flow logs enabled for vpc?

VPC flow logs tells about the request patterns and helps to detect security threats

Region	Vpc	Message	Action
us-west-1	vpc-1234567abc	VPC flow logs are not enabled	Enable vpc flow logs for debugging access requests to the VPC
ap-south-1	vpc-1234567abc	VPC flow logs are not enabled	Enable vpc flow logs for debugging access requests to the VPC
ap-south-1	vpc-1234567abc	VPC flow logs are not enabled	Enable vpc flow logs for debugging access requests to the VPC
ap-south-1	vpc-1234567abc	VPC flow logs are not enabled	Enable vpc flow logs for debugging access requests to the VPC
ap-southeast-1	vpc-1234567abc	VPC flow logs are enabled	All good
ap-southeast-1	vpc-1234567abc	VPC flow logs are not enabled	Enable vpc flow logs for debugging access requests to the VPC
ap-southeast-1	vpc-1234567abc	VPC flow logs are not enabled	Enable vpc flow logs for debugging access requests to the VPC
ap-southeast-1	vpc-1234567abc	VPC flow logs are not enabled	Enable vpc flow logs for debugging access requests to the VPC

vpc: subnets_with_igw_route

Which subnets have route to public?

It is important to know which subnets have routes to public and can somedomain.com vulnerable to attacks. Also sometimes we misconfigure private subnets with public routes

Region	Subnet	Message	Action
us-east-1	default-east-1-1a subnet-abc123	Subnet has route to the world	If the subnet is private then it shouldn't have route to the world
us-west-1	dms-subnet-abc123 subnet-abc123	Subnet does not have route to the world	All good
us-west-1	dms-subnet-	Subnet does not	All good
